

BGS

NEW DEVELOPMENT!

For cutting curved frame components
at any angle between 0° and 60°

03-10

Double Mitre Saw STEGHERR BGS

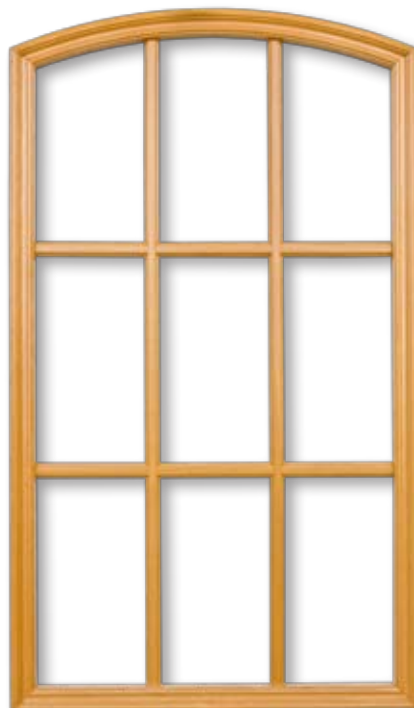

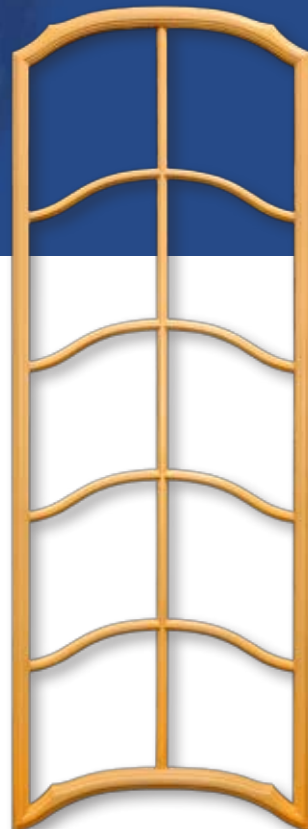

The Double Mitre Saw STEGHERR type BGS is suited for cutting curved (or straight) components up to 1000 mm long.

The specially designed centering and clamping unit ensures the accurate clamping of curved pieces.

Sturdy machine mount, holding two saw units:

- One fix saw unit on the left side of the machine
- One manually displaceable unit on the right side. Adjustment to component length: manually, with digital readout.
- Power ~1100 W each
- Saw blade diameter ~250mm x 30 mm bore
- Both cutting angles are freely adjustable between 0° and 60° over digital readouts
- The saw units are operated over a two-hand safety system
- Dust collection: On each saw unit
