

NC Mitre Saw STEGHERR type GLS

with servocontrolled angle adjustment

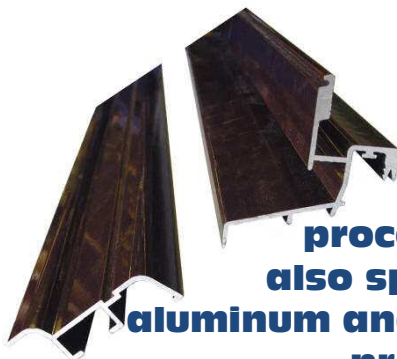

The **NC Mitre Saw STEGHERR type GLS** can mitre-cut glass strips, water drainage channels or similar profiles of wood, aluminum or PVC at any angle between $+45^\circ$ and -45° .

The cutter heads are positioned over servo axes at the angle stored in the machine program.

Speed adjustment of the working stroke over servo axis. Accurate positioning of the workpieces over a NC pusher.

The machine can be upgraded to fully automatic operation by mounting customized workpiece conveyors.

Operator friendly machine program for easy operation both in the manual and the online mode.
