

NF

Notching Machine STEGHERR type NF

The Notching Machine Stegherr type NF is designed for notching in one working cycle several bars up to a total width of 400 mm.

On the NF the bars are accurately cut to length and notched from top and bottom.

The machine can be equipped with either one milling unit (bottom) or with two units (top and bottom).

The powerful milling motors of 4.0 or 5.5 kW (spindle diameter 30 mm) contribute to the overall sturdy execution of this machine, suited for the manufacturing of various types of grilles and frames.
