

DS

Drilling and Dowelling Station STEGHERR type DS for Windows and Doors

The Stegherr Drilling and Dowelling Station type DS is employed for endside drilling and dowel insertion in the workpiece ends.

The machine has three servo controlled axes which make it possible to drill in any position on the work piece.

The following working cycles are program controlled:

- Drilling (various drilling strokes possible)
- Glue injection with a 50 bar glue gun.
- Dowel insertion

The Drilling and Dowelling Station DS has a numeric control with a color 6 inch touch-screen monitor, for a simple operating both in the manual and in the online mode and for the alternate processing of the workpiece ends without any waste of time.

Maximum workpiece dimensions:
360 mm width by 100 mm height
