

TEAR FREE AND PROGRAM CONTROLLED MILLING OF SDL BARS ENDS

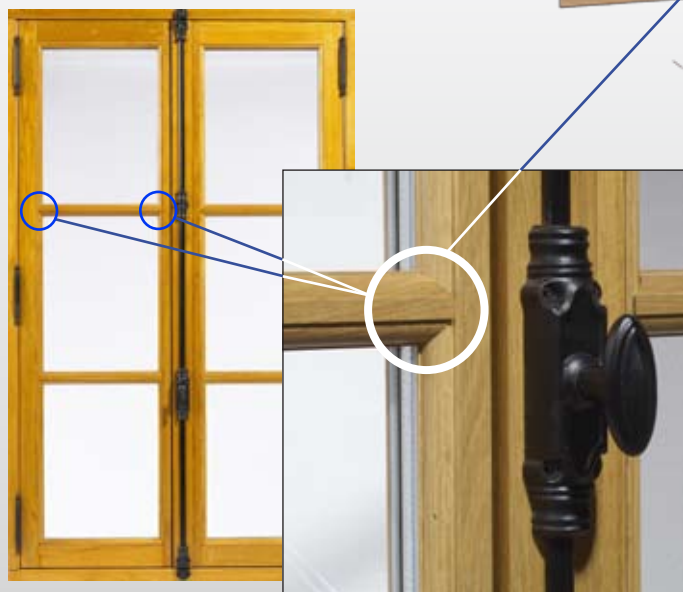

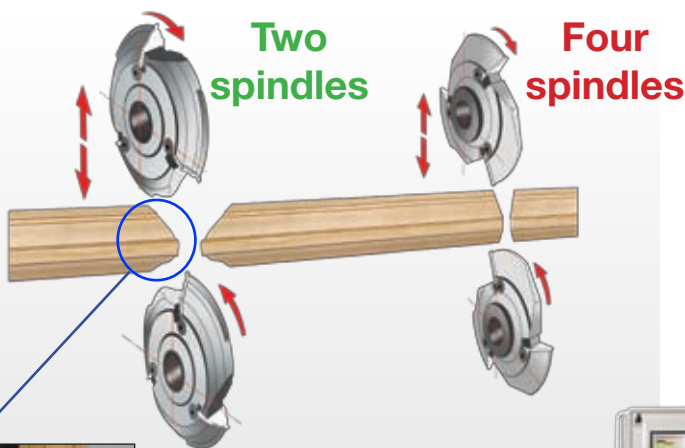

NC Coping Center for SDL Bars SKF

With its two or (optional) four counter rotating milling spindles, the Coping Center SKF ensures tear free coping of profiled stock to identical or different profiles in one single passage.

The machine is available with length optimization, length recognition and defect recognition. The NC pusher ensures absolutely accurate positioning of the bars in the programmed positions. The machine can be upgraded to fully automatic operation by mounting customized workpiece conveyors.

The operator friendly machine program makes operation easy, both in the manual and the online mode.
